

What and how we do?

Logicaster is a Ukraine based company, operates since 2004 and is confirmed as reliable partner. We are small and medium business oriented – thus individual approach is guaranteed. A team with skills, smart, willing to work and already have everything they need for a start on their working place.

What do we do:

- **BPO - Business processes outsourcing**
 - data entry and collection, statistical analysis
 - data scanning, OCR
 - computer operator services
 - e-mail processing and answering
 - form processing services
 - online/offline database support
 - everyday site support
 - webmaster support
 - documents preparation and make-up
 - live chat customer support
- **HRM - Human resources management**
 - building a team for specific project
 - or presenting a single person for operation
- **other IT activity and accompanied tasks**

Sony, NEC, IBM even Ministry of Defense UK are using outsourcing. Very often it is a moving of manufacturing processes into off-base location but not only!

IT outsourcing solutions are not new in the world economics and they are known in informational technology since development of the global Net. Team leader, webmaster and CEO at least once asked oneself about using mentioned benefits and that is why it is a growing sector of worldwide services. So we are not about inventing a bicycle - we are about proposing secure solutions to outsource full spectra of your IT tasks!
